Nader Saiyed Opeyany

Software Developer

I am a Masters in Informatics Science student, Software Developer with 4 years of experience, and I bring a Bachelors in Computer Science. My experiences center around Python scripting and BASH functions on existing and new code bases for NVME SSD drives on a industrial scale, Web Development in C# and BOOTSTRAP as well as Stakeholder Management.

WORK EXPERIENCE

Software Developer
Solidigm

09/2022 - 12/2023   *Rancho Cordova,California*
SSD Memory development for world leading memory manufacturer.
Achievements/Tasks
- Saved 10,000's of dollars by contributing to a new software test suite in Python isolating CPU cores during testing, allowing for multiple SSD tests per server reducing new Server Costs.
- Created new automation scripts to test Non-volatile Memory Solid State Drive using Python, Bash, Linux, Altiris, Git and Jira. Facilitated communication between Stakeholders and Project leads on power and performance testing automation.

Contact : Brandon Vineyard

Software Engineer Intern
Chevron IT

05/2022 - 08/2022   *Houston,Texas*
Achievements/Tasks
- Position as the Software Engineer Intern building a C# and .Net application. Created a prototype of complete work for crude assay data integration between Azure Synapse and Spiral Assay using SDK functionalities and Automation for Enterprise Data Sets to predict hydrocarbon yields. Coordinated with Product Owner and Team Lead on deliverables as well as presented my tool to stakeholders.

Web Admin Intern
City of Sacramento

01/2021 - 05/2022   *Sacramento, California*
Achievements/Tasks
- Worked under and alongside my immediate manager and other Front-end engineers to develop and maintain the City of Sacramento's website using technologies such as HTML, CSS, JavaScript, C#, Sitecore and Seamless Docs.
- [Climate Zero for Zero Admission initiatives page](#) I developed had made the news highlighting excellent State Technology.

EDUCATION

Informatics Major, Masters of Science
California State University, San Jose

01/2025 - Present

Computer Science Major, Bachelors of Science
California State University, Sacramento State

06/2017 - 06/2023
Courses
- Computer Software Engineering
- Intelligent Systems
- Computer Network Fundamentals
- Data Structures + Algorithm Analysis
- Database Management Systems
- Linux Operating Systems
